- Tailwind CSS with semantic design tokens
- Shadcn UI components (Button, Card, Input, Form, Select, ScrollArea, etc.)
- Form validation with zod
- React Hook Form for form management
- Lucide React for icons
- Toast notifications for form feedback
- Mobile responsive design

SEO (index.html)

- Title: "Plumb Care Solutions - Professional Plumbing Services Sydney"
- Meta description: "24/7 emergency plumbing services in Sydney. Licensed & insured plumbers for leak detection, blocked drains, pipe replacement & hot water systems. Fast response & competitive pricing."
- Open Graph tags for social sharing

Hero Image

Use a professional plumbing services image (tools, pipes, or plumber at work)

Example of webhook data if you want it for testing:

```
[  
  {  
    "params": {},  
    "query": {},  
    "body": {  
      "First Name": "rick",  
      "Last Name": "james",  
      "Email": "paddycam0007@gmail.com",  
      "Address": "123 Main street",  
      "City": "Melbourne",  
      "State": "VIC",  
      "Postcode": "1234",  
      "Country": "Australia",  
      "Contact Number": "0412345678",  
      "Service Required": "Toilet seat needs replacing",  
      "Preferred Date": "2025-11-07"  
    },  
    "webhookUrl": "https://n8n.wfnn8n.org/webhook/",  
    "executionMode": "production"  
  }  
]
```
